| 0 | 1 | 2 | 3 | 4 | 5 |  | 6 | 7 | 8 | 9 | 10 | 11 | 12 |

## Instructions:

1. The numbers on the bottom "track" are factors.

The numbers on the "Block ' $N$ ' Row grid" are the products.
2. Player 1 places two paper clips on any two numbers on the "track" and multiplies the two numbers. Player 1 then colours in 1 square on the "Block ' $N$ ' Row grid" that matches the product. (For example: If player 1 places a paper clip on the 3 and the 6 , then he/she would colour one of the 18 's on the "Block ' $N$ ' Row grid."
$\rightarrow$ Note: There is more than one 18, but only one can be covered this turn
3. Player 2 must move one paper clip, but only one. He or she finds the resulting product and colours that square on the "Block ' $N$ ' Row grid."
$\rightarrow \quad$ Note: Both paper clips can be place on the same factor to create a number sentence, for example $6 \times 6$, or $4 \times 4$, etc.
4. Play continues until one player has coloured 3 squares in a row
$\rightarrow$ horizontally, vertically, or diagonally
